

Table 52
Nkamouna Environmental and Social Impact Assessment
Primary Anthropogenic Greenhouse Gases (GHG) and Their Sources^a

Sources	Level of Impact ^b			
	Carbon Dioxide	Methane	Nitrous Oxide	CFC
Trucks	2-	0	0	0
CHP unit	3-	0		0
Generator	1-	0	0	0
Fertilizer Application	0	0	1-	0
Afforestation	3+	0	0	0
Landfills	0	1-	0	0
Miscellaneous applications	0	0	0	1-

^aCO, non-methane hydrocarbons and nitrogen oxides are excluded as they have a minimal influence compared to the primary GHGs. Water vapor, a significant GHG, is not believed to be significantly affected by human activities

^bLevel of impact: 3 = significant; 2 = moderate; 1 = minor
